

Description of the measure

Women 21-64 years old who were screened for cervical cancer using either of the following:

- Women 21-64 years old who had a pap smear at least once during the measurement year or three years prior
- Women 30-64 years old who had a pap smear + HPV co-testing during the measurement year or five years prior

Exclusions

- Hysterectomy with no residual cervix (“complete”, “total” or “radical” abdominal or vaginal hysterectomy with no residual cervix; date performed must be clearly documented in the medical record)
- Members receiving palliative care

Tips for best practice

- Submit appropriate billing codes (see table below)
- Outreach to members who have not yet had a pap smear
- Determine if the member sees an OB/GYN and request results of pap tests
